

COREP Outreach Clinical Data Analysis Report

Outreach Date: 2026-08-27

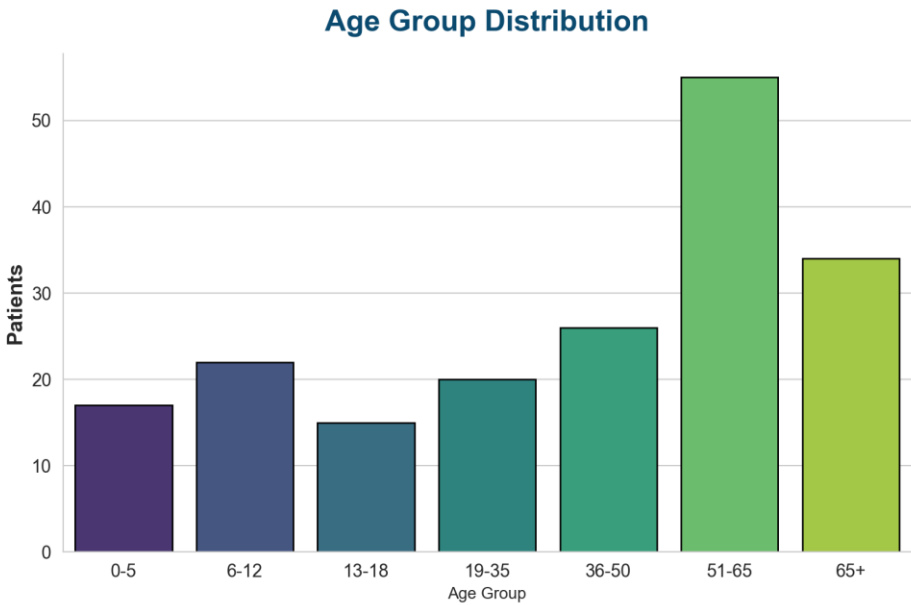

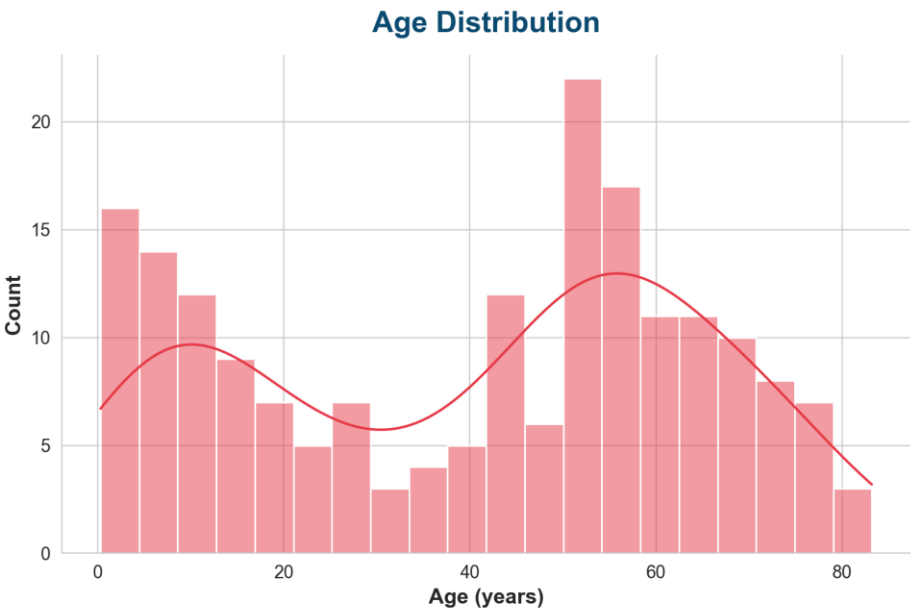

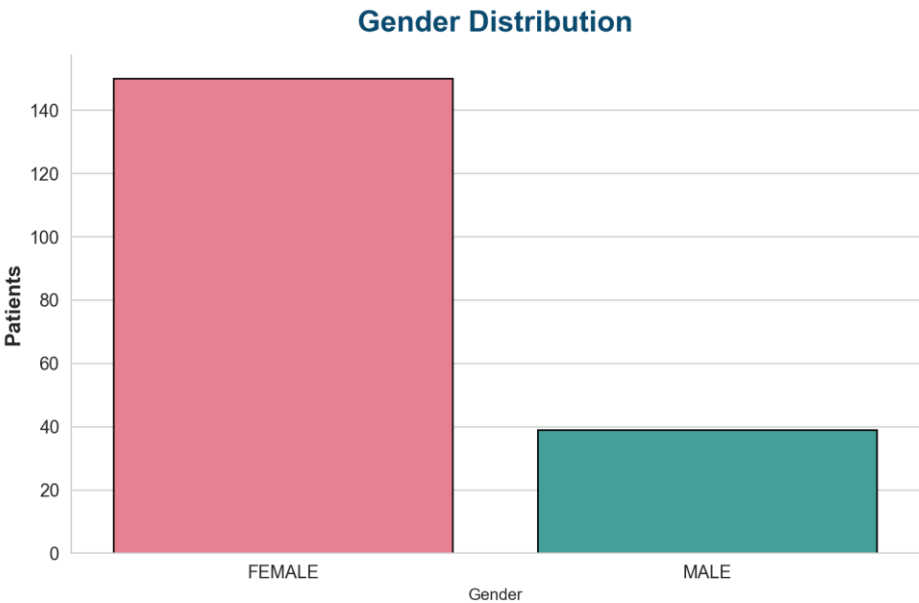

1. Executive Summary

Total Patients	189
Gender Split	FEMALE: 150, MALE: 39
Average Age	40.4 years
Admitted Patients	0
Top 5 Diagnoses	Malaria (17) Arthritis (11) Allergies (6) Hypertension (5) Stable (4)
Malaria Positive Tests	0
Top 5 Dispensed Drugs	Multivite (13) Vit c (11) Albendazole 400mg stat (10) Vit bco (9) Vitamin c (9)
Drugs Needing Reorder	19

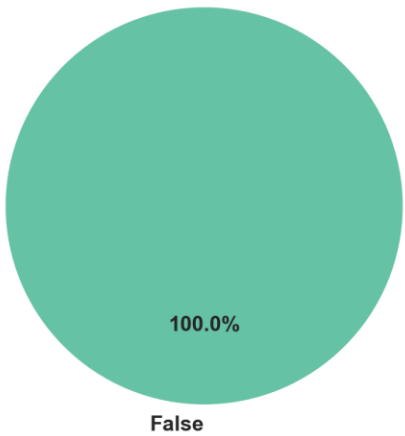

2. Charts & Findings

2.1 Patient Demographics

Patient Demographics

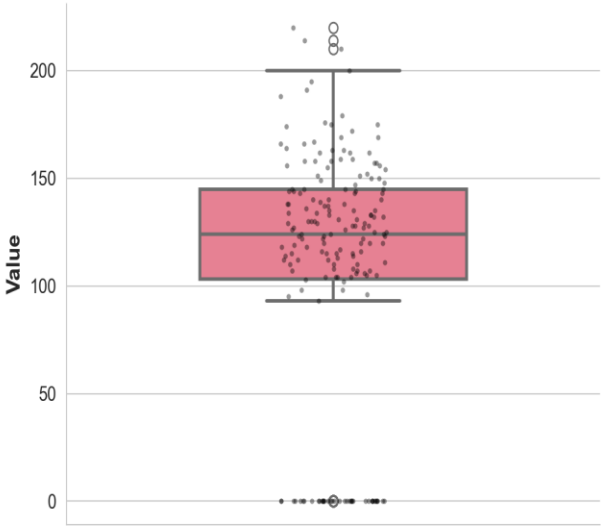

Admission Status

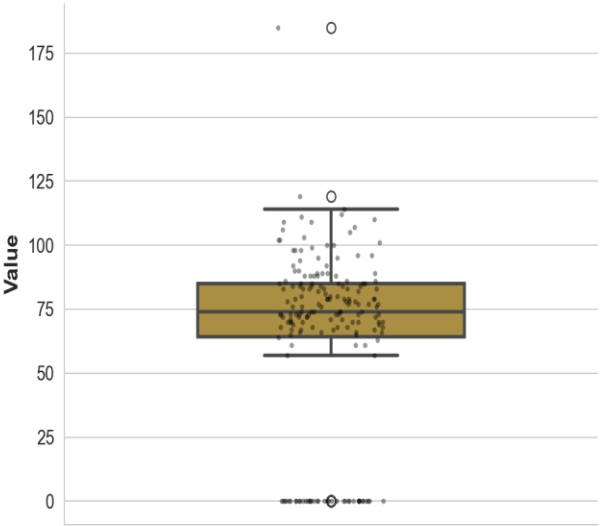

2.2 Vital Signs

Vital Signs Distribution

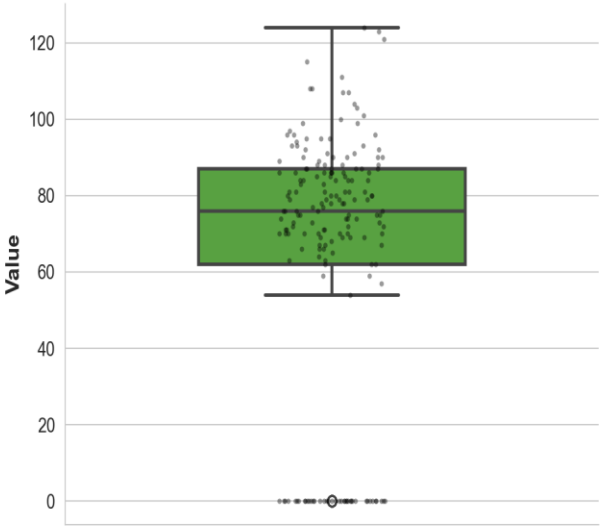

Blood Pressure Systolic

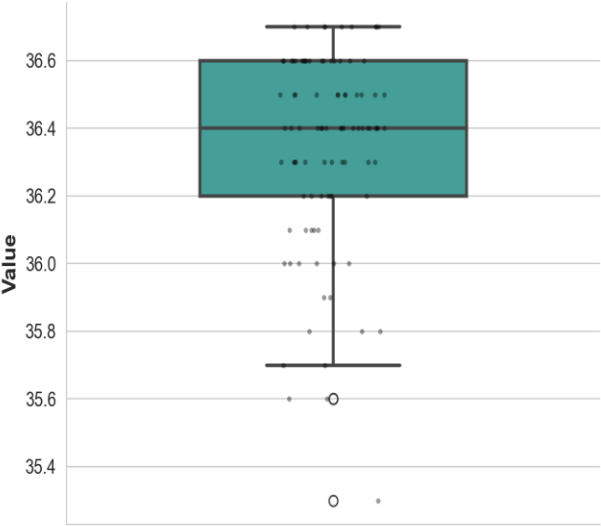

Blood Pressure Diastolic

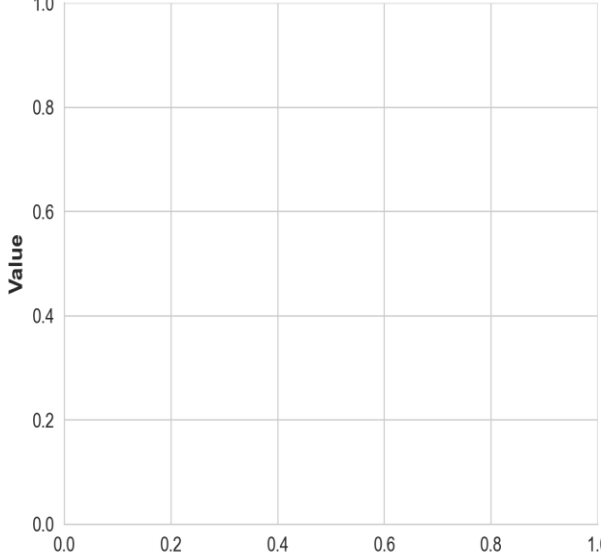

Pulse Rate

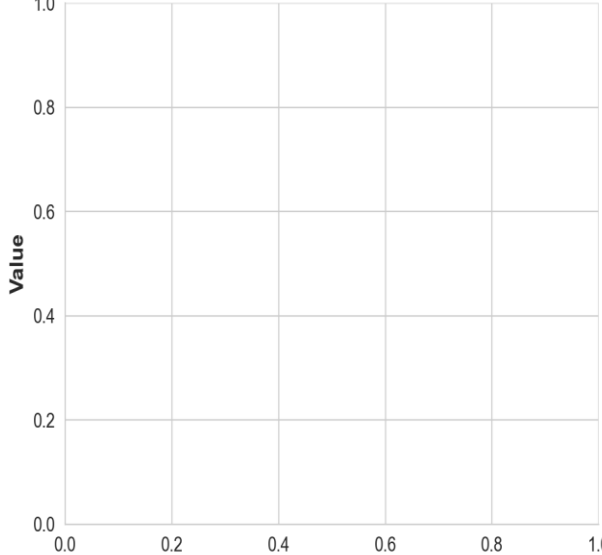

Temperature

Respiratory Rate

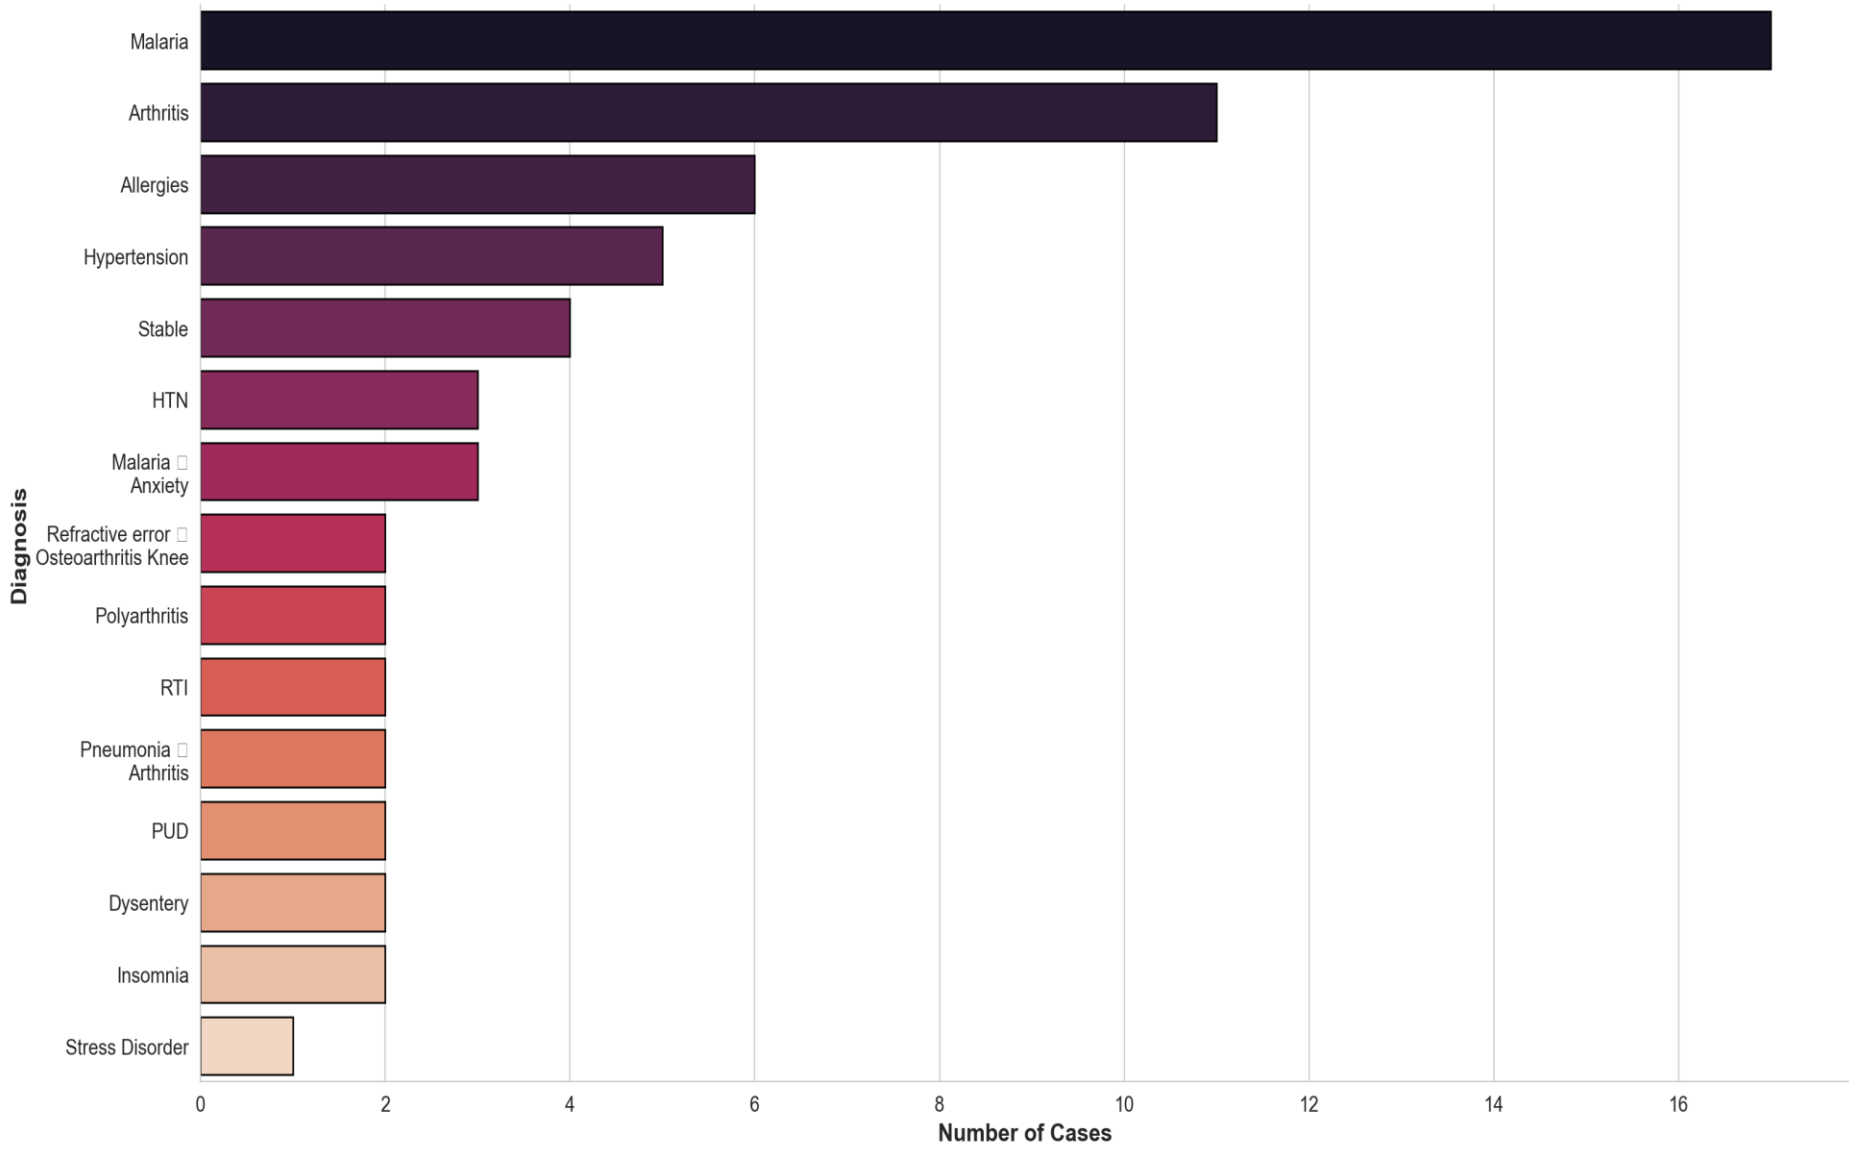

Oxygen Saturation

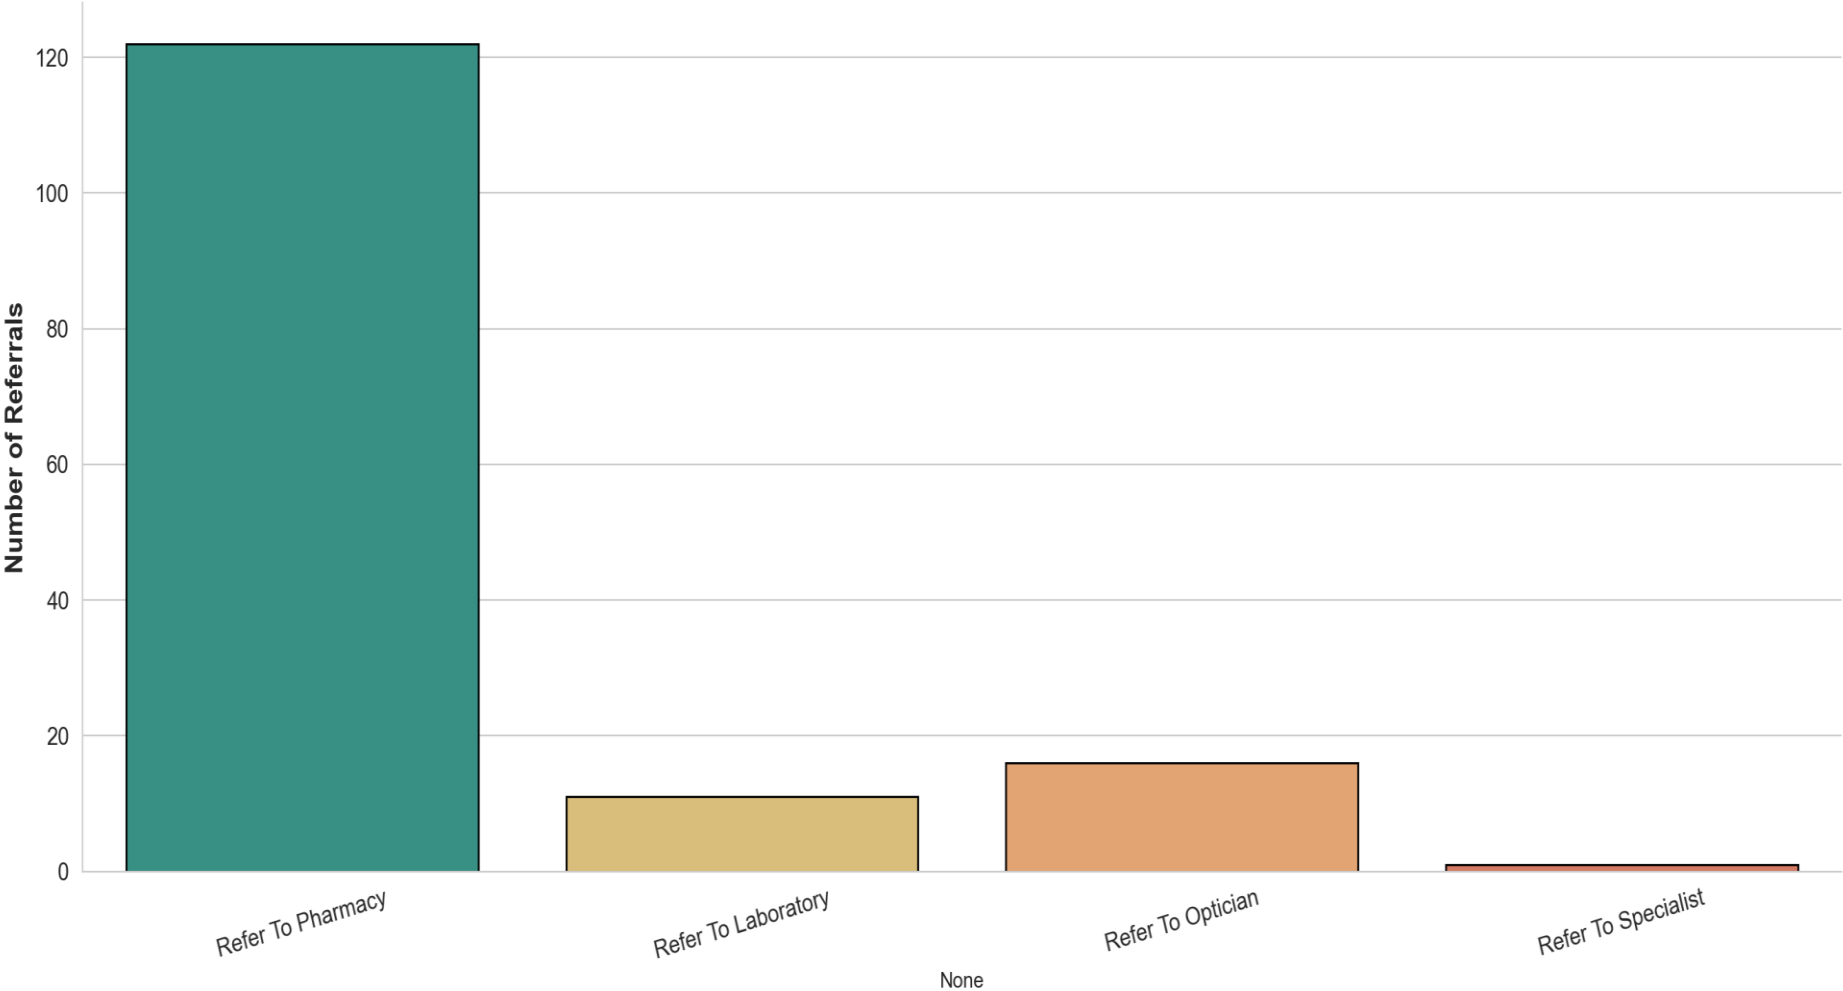

2.3 Top 15 Diagnoses

Top 15 Diagnoses

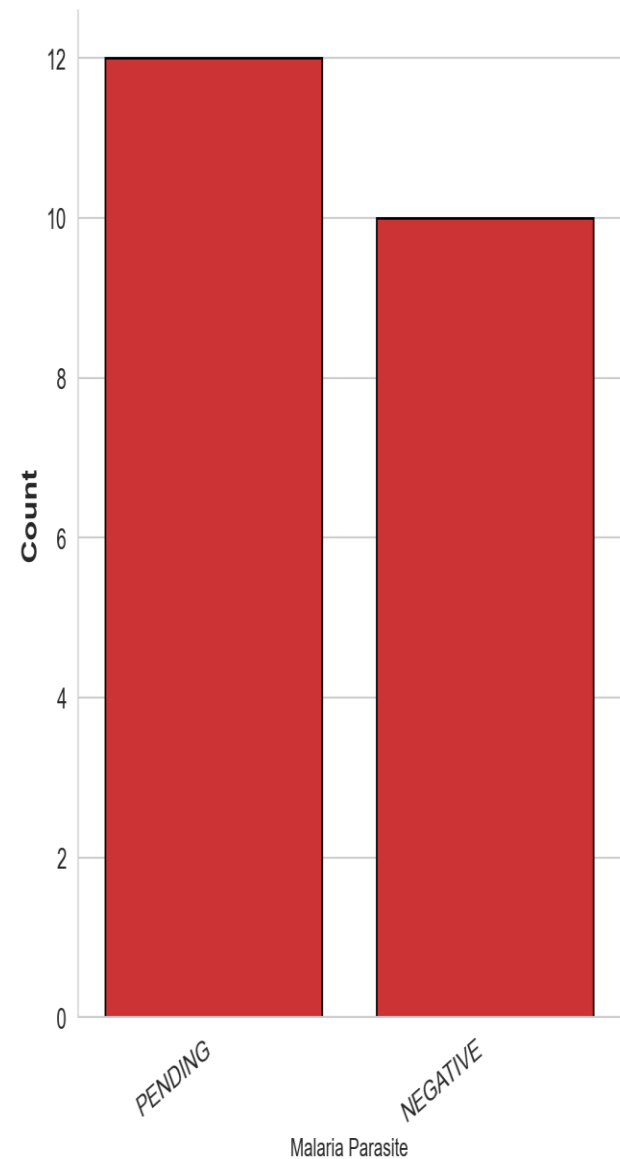

2.4 Referral Distribution

Referral Distribution

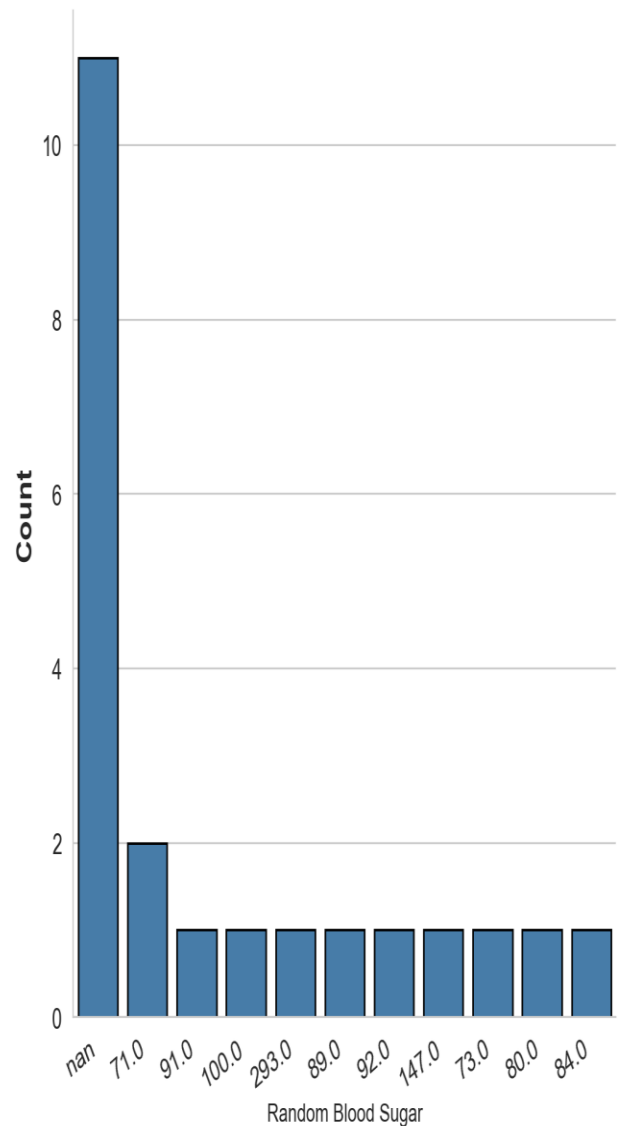

2.5 Lab Test Results

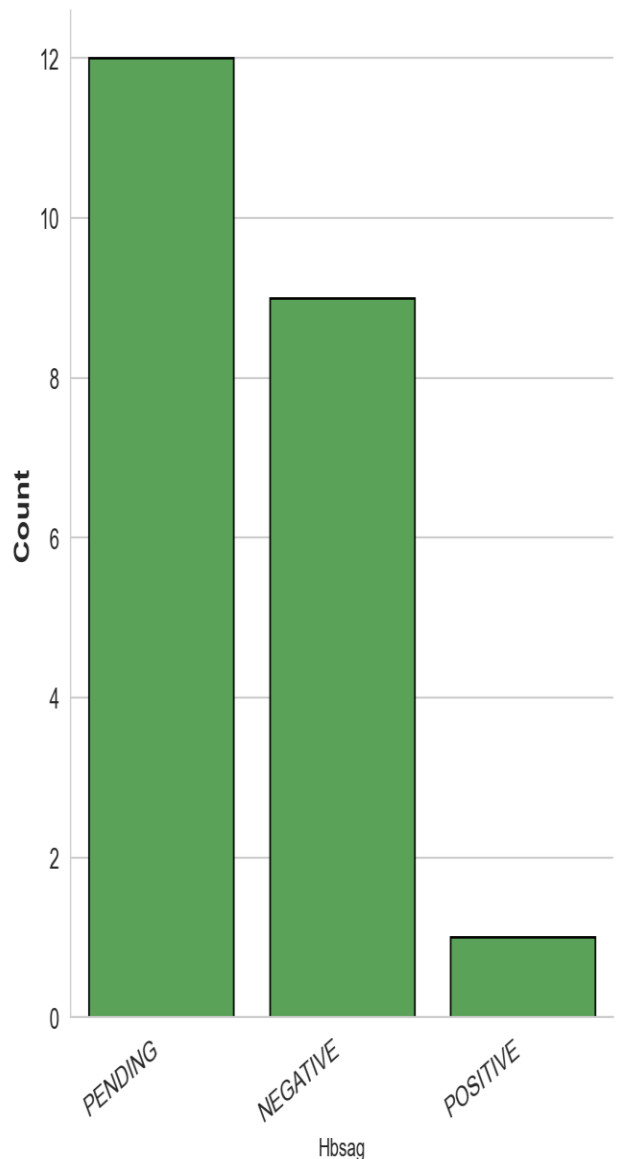

Malaria Parasite

Random Blood Sugar

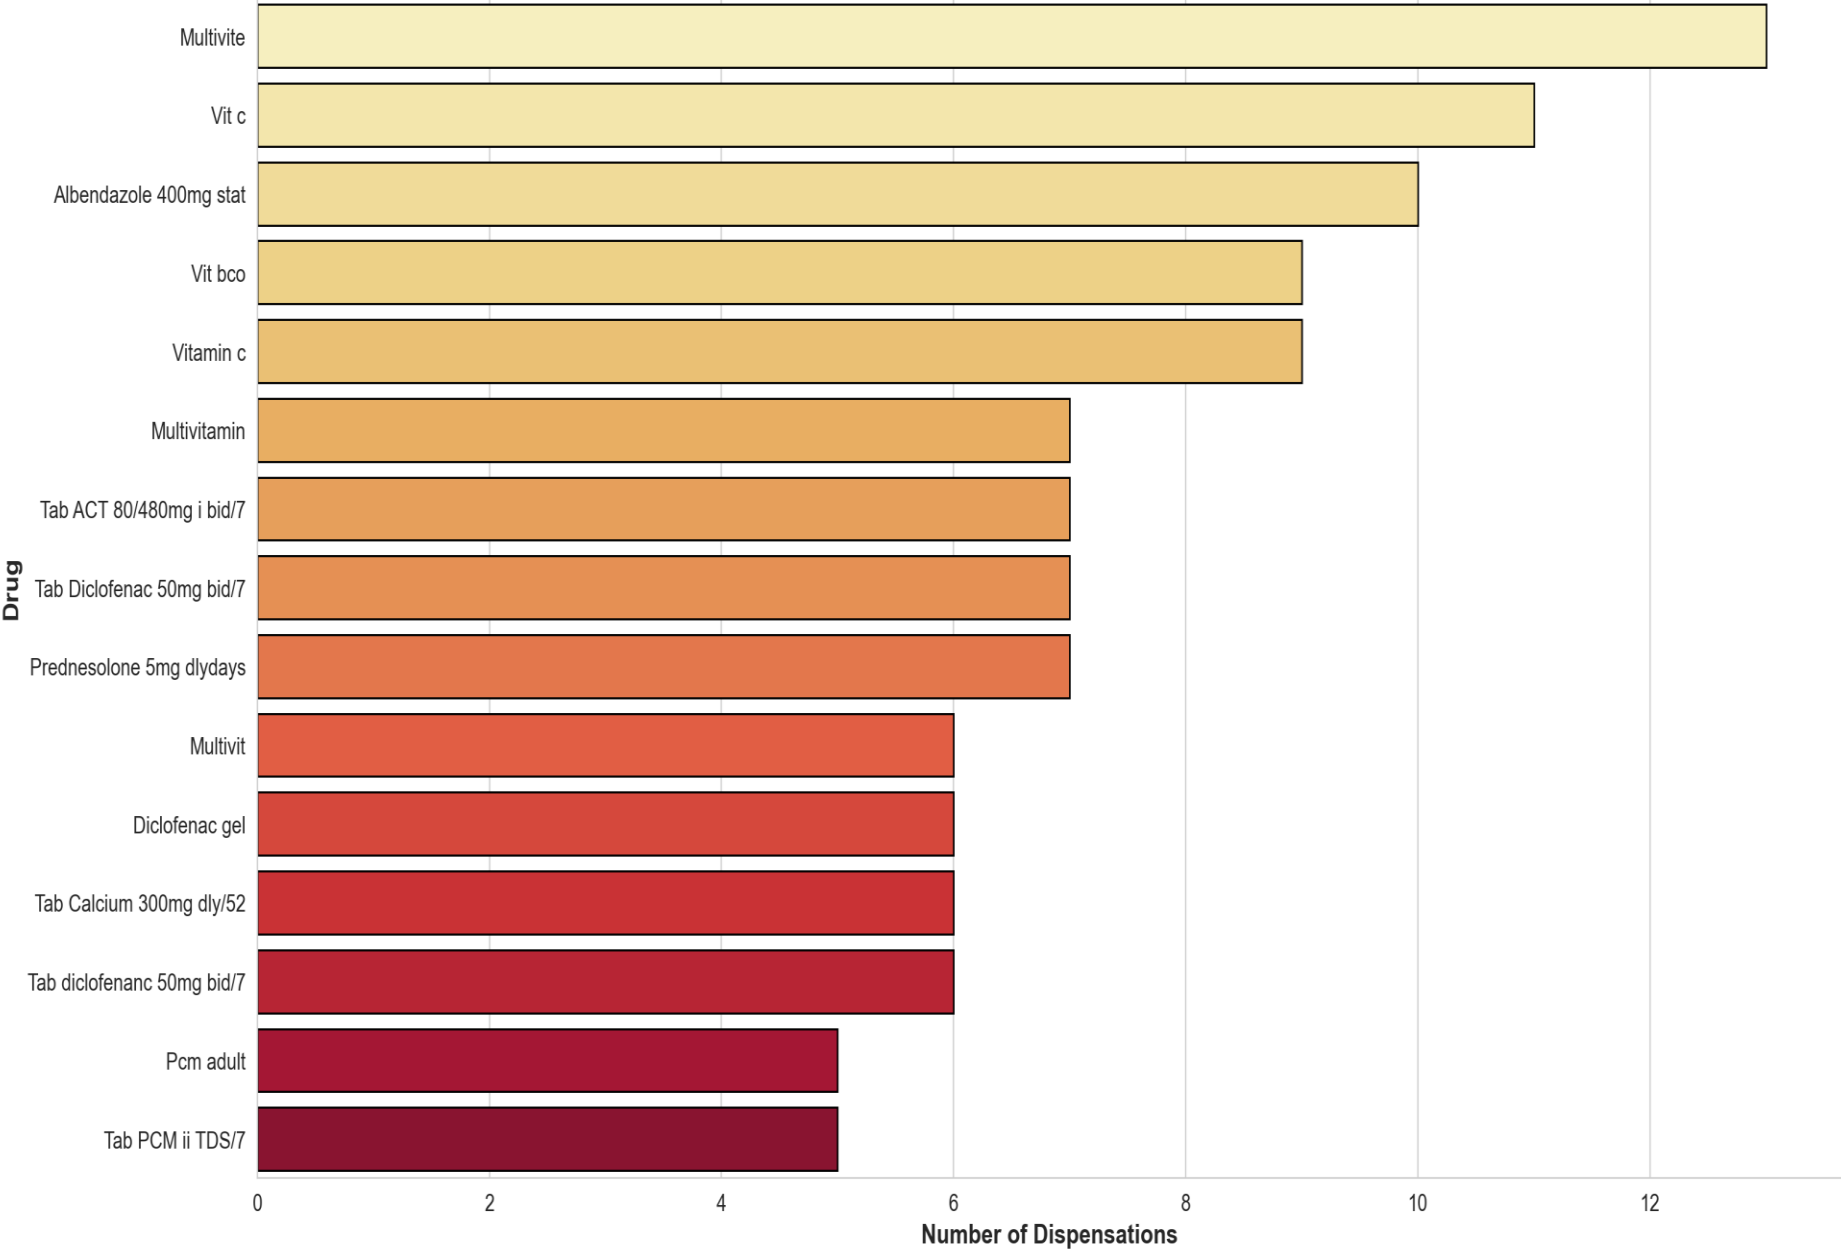

Hbsag

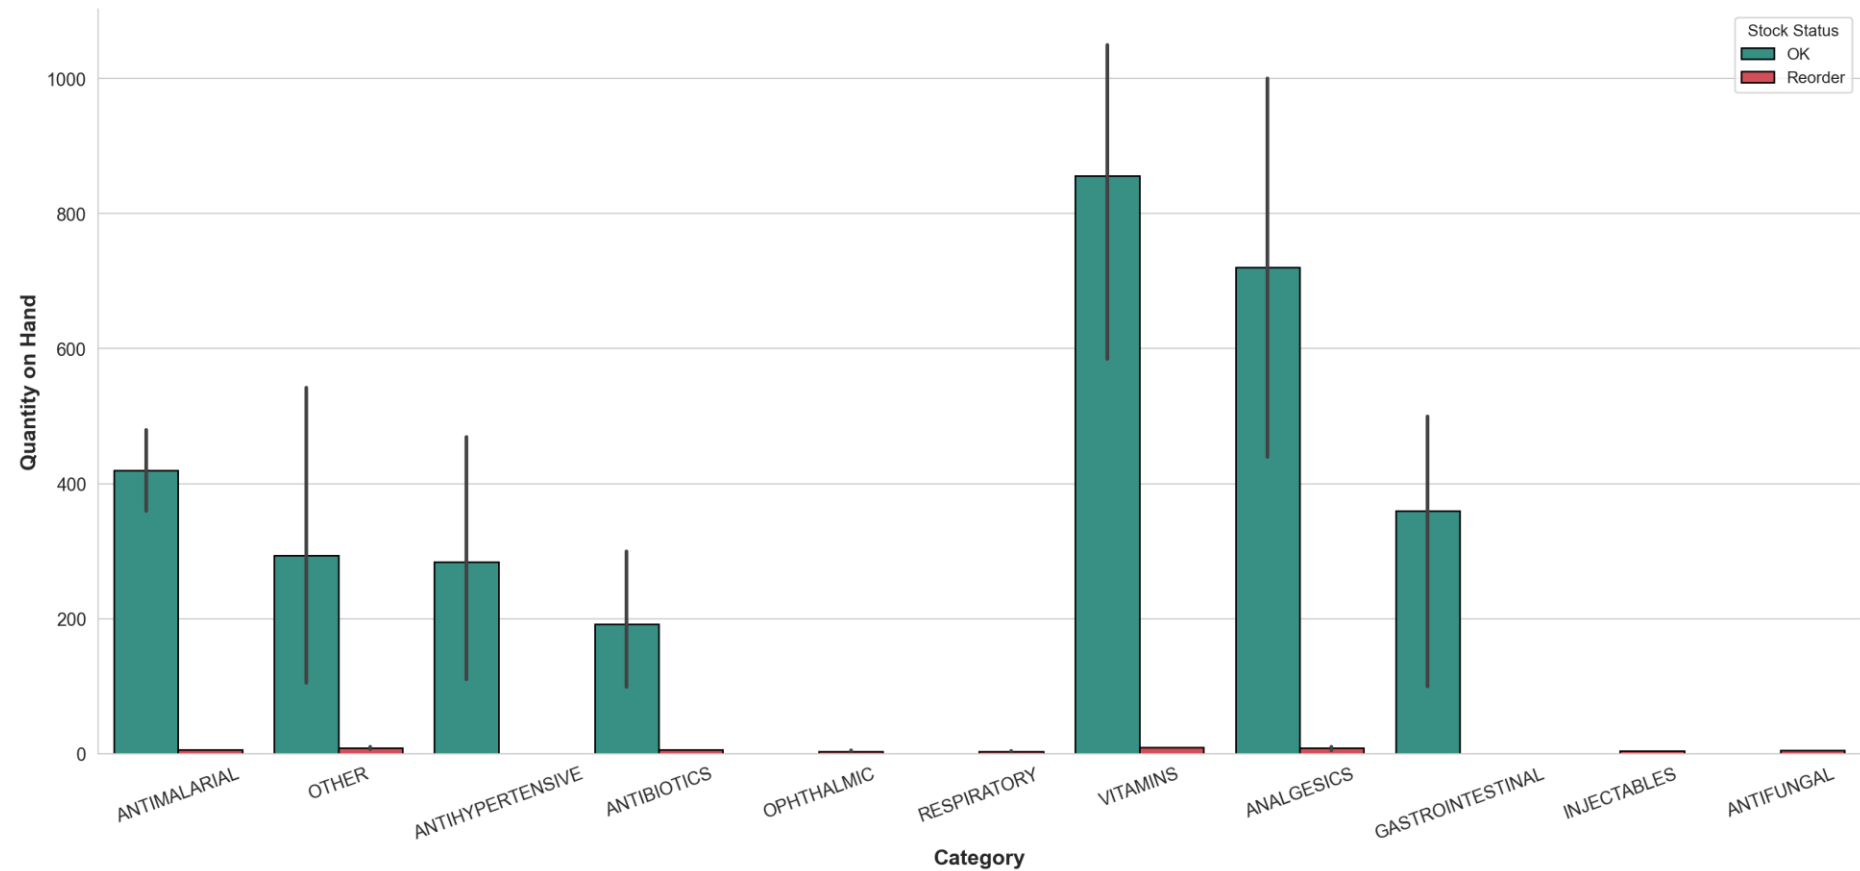

2.6 Top 15 Dispensed Drugs

Top 15 Dispensed Drugs

2.7 Drug Stock by Category

Drug Stock by Category

3. Treatment Plans (Clinical Only)

Prescription-related text has been removed. Only clinical/non-pharmacy instructions are shown.

Consultation ID	Treatment Plan (Clinical)
1	Diclofenac Tizanidine Gelusil 2
2	Nifedipine Hydrex
3	Prednesolone
4	Referred to Eye Antallergebeye drop 1 bid x 2weeks Vitamin b co Multivitamin
5	Diclofenac Cough
6	Cefixime Vitc c Vitamin b Co Multivit
7	Diclofenac Vit bco Piriton
8	Diclofenac Vit bco Muktivit Prition Diclofenac gel
9	Diclofenac Vit bco Muktivit Prition Diclofenac gel
11	Nifedipine Vasoprin Diclofenac
12	Vit c Multivite Piriton
13	Antallerge eye drop Vit c Vitbco Multivite
14	Vitc c Mutivit Diclofenac
15	Flagyl Tab
16	Amoxil 5mls Vit c
17	Diclofenac Prednesolone Vit c Multivit Vitbco Mectizan
18	Vit c Multivit Vit bco
20	Mectizan Yeast 2 x 2 weeks
21	Yeast 3 x 1 month Loratadine Vitamin b Co Multivitamin
22	Nifedipine Vasoprin , then Diclofenac Albedazole

4. Key Insights

- Patient registrations show a consistent trend — monitor monthly volume for resource planning.
- Top diagnoses drive most of the clinical workload — target training and drug stocking accordingly.
- Referral pathway indicates the strongest downstream load (Lab vs Pharmacy vs Optical).
- Low-stock alerts must be actioned promptly to avoid stockouts.
- Use the forecasting module to plan drug & staff demand for the coming month.
- Patient clusters reveal distinct risk groups for targeted interventions.
